Environmentally Friendly .

GOLDEN FAITH Safety Copper free silver mirror use the new manufacturing process is more Environment friendly at it excludes the use of copper and lead. Polluting waste products are considerably reduced during manufacture and downstream processing stage. The products is easier to recycle.

Advantages

Contemporary colours

GOLDEN FAITH color lacquered glass combines the attractive appearance of the lacquer with the clarity of glass.

There are ten shades in the range: five light colour, contrasting with five deep colours, including black.

The stylish, radiant colours of GOLDEN FAITH color lacquered glass co-ordinate well with natural materials (wood ,metal , stone etc).

Resistance to moisture

The composition of the lacquer used in GOLDEN FAITH color lacquered glass enables the glass, in all colours, to be used in damp and humid rooms such as kitchens and bathrooms, without additional protective backing.

Durability

The lacquer is applied to the reverse side of the glass so is protected from damage and ensures that the colour are durable and bright

Safety Mirror’s Production (CAT-I)-

Safety Mirror's Production (CAT- II)

Safety lacquered glass

GOLDEN FAITH safety lacquered is a lacquered safety glass. A special safety film is applied to the reverse side of the lacquered glass. If the glass is broken the film holds the fragments of glass in place, thus reducing the risk of injury.

Note

Despite every care taken with the product, and strict manufacturing controls, there may be slight variants in shade between two production runs.
